2. Perform compatibility testing of a web application across multiple browsers and operating systems, documenting any issues found.

Summary

- Application Name: Flipkart

- Testing Type: Compatibility Testing

- Test Date: 22/02/2025

- Tested By: Shardul

- Objective: To ensure the web application (Flipkart) operates as expected across various browsers and operating systems.

Test Environment:

OS	Browser	Device	Status
Windows 11	Google Chrome	Desktop	Pass
Windows 11	Microsoft Edge	Desktop	Pass
macOS	Google Chrome	MacBook	Pass
macOS	Firefox	MacBook	Pass
IOS	Google Chrome	POCO X5 Pro	Pass

Test Scenarios:

Test Scenario	Expected Result	Actual Result	Status
Website loads successfully	Page loads without errors	Page loads fine	Pass
Navigation menu works	The menu opens and navigates smoothly	Works as expected	Pass
Forms (Login, Signup)	Forms submit without UI breaks	Works as expected	Pass
Add-to-cart works	The user should able to add 20 items	Works as expected	Pass
Pop-ups and alerts	Pop-ups and alerts appear properly	Pop-ups and alerts did not appear properly	Fail

Issues Found:

Issue ID	OS	Browser	Description	Severity	Status
001	IOS	Chrome	On iOS Chrome, pop-ups do not display correctly, sometimes appearing off-screen or failing to close on user interaction.	High	Open

Conclusion:

The Flipkart web application functions well across most platforms. However, a pop-up display issue on **iOS Chrome** affects usability and requires fixing.
